TEXTBOOKS:

1. Shawn Callahan, "Putting Stories to Work: Mastering Business Storytelling", Pepperberg Press, 2016.
2. Will Storr, "The Science of Storytelling: Why Stories Make Us Human, and How to Tell Them Better, William Collins, 2019

REFERENCES:

1. Indranil Chakraborty, "Stories at Work: Unlock the Secret to Business Storytelling", Portfolio, 2018

SKILL BASED ACTIVITIES (SBE):

Note:- These Projects/activities are only indicative; the Faculty member can innovate

Mini Project:

1. Prepare a guide for Digital Storytelling on social media platforms starting with – Developing an idea, the plan, the script, the finished product, and publishing and sharing on platforms.
2. A detailed report may be prepared covering how does a company communicate through story telling? This should cover frameworks, the methodology, while covering one real life story.
3. Video making/slides on the given topic of Presentation- Self Introductory Video Resume

Case Studies:

1. Digital storytelling combines the timeless art of storytelling with the potential of digital media and technologies. The difference between traditional Storytelling and Digital Storytelling is that, while in the former it is fundamental to have a good storyteller and an attractive content, in the realm of digital, beyond these imperatives, the media take care of the situation. The command of tools for the production of content in digital and multimedia formats as well as the distribution channels has to be very well adapted to the characteristic of the distribution and consumption platforms. The three main goals of storytelling are to engage, to activate memorization and to stimulate sharing. In the age of web 2.0, sharing means "going viral". The internet breathed new life into the resource at a time when media convergence became a basic requirement of usability and navigability. Then came the term trans media storytelling. The role of the narrator is no longer unique to the effectiveness of communication but remains crucial. The narrative must have a dramatic principle and the media have to be well defined because they are static. Storytelling must be adapted to content consumption.

How can Augmented Reality, Virtual Reality, 360 cameras, drones, etc. be applied to tell exciting and captivating story? Also, what are the important tools, technologies and platforms being applied in today's context?

2. As a project manager, are you communicating the messages you want to communicate? Have you tried using storytelling skills to enhance your communications? Storytelling is not just for kids. It is a vital tool for project managers seeking to communicate complex problems, establish relationships, connect with difficult stakeholders, and create compelling visions. Your success and results depend on those key conversations and presentations that require your attention throughout the project. Making things happen through other people requires strong communications and leadership skills. By employing and enhancing your storytelling skills, you can raise the effectiveness of your communications to another level. What are the strategies to be applied for personal, corporate, and professional knowledge for

powerful stories that will create shared visions and win-win solutions?

Identify storytelling skills that can enhance project success?

What are the techniques to craft powerful stories with purpose to accomplish your objectives?

Course Outcomes:

At the end of the course, students will be able to

Course Outcomes	Description	Bloom's Taxonomy Level
